

VAYDOR

The Exotic Car Experience Without the Exotic Car Price.

Built in limited numbers with a wide variety of customization options, Vaydor delivers exotic car power, performance, and styling at an affordable price.

CONCEIVE

The Vaydor is a Matt McEntegart design. It's unique styling and craftsmanship stem from Matt's experience designing custom cockpit interiors for high-dollar Cigarette boats in Clearwater, FL.

Drafted on paper and carved by hand out of expandable foam, it took over 12 months to take this vision from a sketch to an exquisitely crafted, truly hand built car.

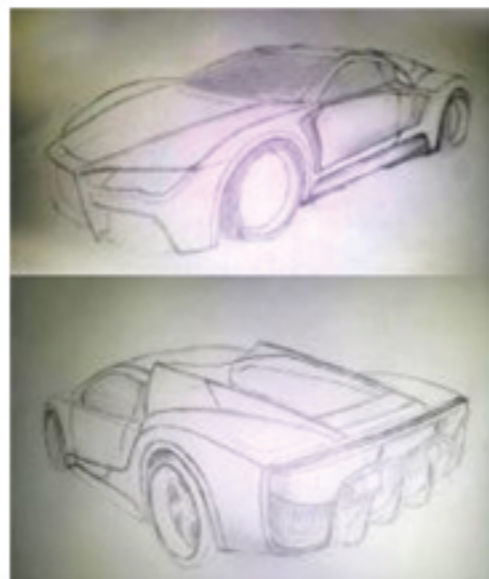

BUILD

To remove the exacerbated cost of designing and building a chassis for the Vaydor, the car is built upon a Infinity G35 Coupe chassis. This platform was chosen for the long wheelbase and quality structure (600-1,000hp motor applications are frequently applied to this chassis without modification).

During the build process, a new tubular 8-point roll cage "super structure" is added to the chassis to support the new body and interior. Approx 500lbs are shedded from the original G35 curb weight during this process.

Hardtop & Roadster models are available, as well as an all-wheel drive option.

CUSTOMIZE INTERIOR

The Vaydor cockpit is finished in high quality leather, suede, wood, and carbon composites. A wide palette of colors and materials are available to choose from as part of your build process.

EXTERIOR

An extensive variety of House of Kolor paint colors are available to choose from to customize the exterior and rims of your Vaydor. For added flare, a carbon fiber trim component package is available add-on option.

POWER

To match the supercar styling of the Vaydor, powerplant options ranging from ~360 to ~1,000hp are available. These outputs are accomplished via 4 engine options:

- Infinity VQ35DE Naturally Aspirated 3.5L V6
- Infinity VQ35DE Twin Turbo 3.5L V6
- GM LSIII Naturally Aspirated 6.2L V8
- GM LSIII Twin Turbo 6.2L V8

CONTROL

To keep all that horsepower under control, the Vaydor's suspension setup utilizes a fully adjustable coil over kit with heavy duty sway bars and Big Brake Kits from Brembo, Wilwood, and Stop Tech. Active suspension or air ride set-ups are available add-on options.

265/35/22 (front), 345/30/22 (rear) Pirelli Zero tires wrap the 22x9.5 (front) and 22x13 (rear) Amani Forged "Vaydor" custom rims.

PROTECT

Insurance packages are available as part of your purchase.

All powertrain options come with a 36 month manufacturer warranty and can be serviced by any Infinity or GM certified service provider. Engine/Powertrain parts can be sourced by any Infinity or GM parts sourcer.

Additional service support can be provided by Premier Motorworkz Customer Service Department and coordinated with your local service center.
